Subject: EVERCIDE® Total Release Aerosol 2614  
EPA Reg. No. 1021-1674  
Pyrethrins Reregistration  
Label Changes in response to Agency letters dated March 23, 2010 and July 6, 2011  
regarding Indoor Total Release Foggers and to revise First Aid and Precautionary  
Statements.

Dear Moana:

We are amending the label for the subject product per the Agency's recent letters regarding language for total release foggers also we are submitting a new primary skin irritation study and revising the first aid and precautionary statements accordingly to avoid a tox category II designation and restricted use designation for this product per the Agency's acute toxicology review dated October 4, 2010. We are submitting this study to PRD per Carmen Rodia's e-mail of July 20, 2011

Enclosed are the necessary documents to support the label changes for the subject product using the "Selective Method" of support. The following items are included on the enclosed compact disc:

Application for Amendment  
Certifications with Respect to Citation of Data  
Formulator's exemption  
Data Requirements Matrices (Internal copies and Public copies)  
The proposed label.(2 copies, 1 with changes highlighted)

Additionally, the following studies are also included on the enclosed compact disc:

**MRID# 486536-01** EVERCIDE® Total Release Aerosol 2614 Rev. 2, Primary Skin  
Irritation Study in Rabbits, November 4, 2011 by Aija McKenzie  
**Lab Study No. 33069** (Guideline No. 870.2500)

If there are any questions or you need anything further, please call me at 1-800-645-6466 or e-mail me at [tom.lennan@mgk.com](mailto:tom.lennan@mgk.com).

Sincerely,

McLAUGHLIN GORMLEY KING COMPANY
